One Treatment Doesn't Fit All!

Join the **FLASH Study** and Take a Targeted Oral Treatment Approach for Your Asthma

A new clinical research study to collect information on the use of an investigational drug called **Atuliflapon** in adults who have **moderate-to-severe asthma** that is not controlled with current treatment alone.

If you are interested in taking part in the **FLASH Study**, we are looking for individuals who:

- Are **18 to 80 years old**.
- Have been **diagnosed with asthma for more than a year**.
- Are **experiencing** asthma symptoms such as **wheezing and breathlessness** and have had **at least one asthma flare-up** for which steroids were required in the **last year**.
- Are currently being **treated with daily inhaled asthma medications** and have been for **at least 3 months**.

There are other criteria that you will need to meet to qualify, which the study team will discuss with you.

If you think you may be **eligible to participate** and would like to learn more about the **FLASH Study**, please contact our study team using the details below. You may also visit www.flash-asthma-study.com for more information:

Name: _____

Study center: _____
